

2017 – 2020-21 VFM Sales Summary

Summary of market sales by vendor category and location. We generate these results through collection of vendor reports – it is very important to submit your vendor report at the end of each market.

Reminder that these numbers are averages, individual vendor sales will vary greatly. Market Managers may have a better idea of what range of sales you should expect.

MATURE MARKETS: These weekend markets have been running for over 10 years, have achieved word of mouth notoriety and are predominantly composed of experienced vendors who have built up a customer base. New vendors are not eligible for mature market dates in the first round of scheduling.

GROWING MARKETS: These weekend markets have been running for less than 10 years and are composed of both experienced and new vendors, all of whom are working on building a new customer base in a new location. VFM allocates significant resources toward promoting them.

MID-WEEK MARKETS: Mid-week markets are different from weekend markets because individual shoppers tend to spend less time and money per visit. VFM focuses on increasing the number of shoppers at these locations and finding the right vendor base to suit mid-week shopper needs.
